Law Enforcement

continuing to celebrate over 25 years as the performance leader

COR•BON

Glaser Safety Slug

To Our Respected Law Enforcement Customers:

Welcome to our Law Enforcement catalog. We have been producing premium, high performance ammunition for over 25 years. We are an American family owned corporation that takes pride in our innovative products and workmanship. The majority of our customer service team are either LE Officers or members of the Sturgis SRT Team. They have many years of combined service in the Law Enforcement community as well as participating in many specialized tactical training courses. We feel this gives us the knowledge to relate to your specific needs.

Our Company has the most modern manufacturing and pressure testing equipment in the industry today. In March of 2004, we became a member of the Sporting Arms and Ammunition Manufacturers Institute, SAAMI. We use only the highest quality components and put our products through rigorous daily testing to insure that we bring you the safest and most reliable products on the market. I believe our research and development team is second to none. We listen to the needs of our customers like you. Our innovation is Always one Step Ahead!

We actively service the law enforcement community with direct sales to police departments, governmental agencies, tactical units and individual officers. While we recognize that our products have earned a reputation as the very best ammunition money can buy, it's a mistake to think that our price is outside your department or personal budget. We work very hard to keep prices down and our quality up. Superiority is not cheap. There may be less expensive ammunition available, but are you willing to bet your life on what you think is a bargain?

We believe that we have the entire Law Enforcement ammunition spectrum covered with COR®BON/Glaser Products. All your needs can be met within our Company.

• DPX is our line of deep penetrating yet consistent expansion ammunition. It features a solid copper X bullet that offers 100% weight retention and a larger permanent crush cavity. Designed to perform well after going through hardened barriers while not over penetrating the target if barriers are not present. This is a lead free, environmentally friendly load.

• COR®BON Classic Jacketed Hollow Point ammunition, for moderate penetration and maximum stopping power (temporary stretch cavity). We offer each caliber in a variety of bullet weights. You can choose the performance and penetration levels that fit your needs.

• The Pow'RBall line is designed for slower, more controlled expansion. The round nose profile makes it a reliable and a consistent feeder in auto pistols. It is unaffected by heavy or light clothing. This load is an excellent round for your duty gun as well as your back up.

• Glaser Safety Slug is used for limited penetration, reduced ricochet and maximum tissue damage. Its' pre-fragmented design delivers the available energy in the intended target and creates immediate shock and trauma. Excellent for use in your back up gun, and close security work.

To obtain exclusive pricing on all of our products, please contact our sales staff. Individual officers may request special pricing by faxing their LEI with the product selection. Law enforcement agencies will be required to submit requests for all quotes on department letter head and to submit a tax exempt certificate which must be on file at the time of purchase. Quantity pricing is also available and quoted on an individual basis.

We feel that once you try our products, you will come to rely on nothing else!

Stay Safe,
Peter R. Pi

President COR®BON/Glaser

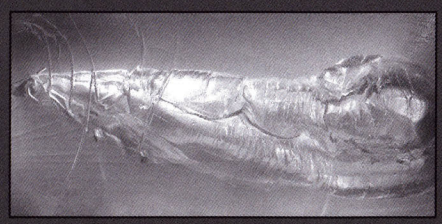
COR®BON's line of premium jacketed hollow point ammunition has been the choice of departments nationwide. We use a specifically designed bullet and low flash powder. Officer testimonials have demonstrated COR®BON's jacketed hollow point line of ammunition as the top performing ammunition in the industry! Consistent, reliable expansion, accuracy, penetration and high energy are the keys to making this round work.

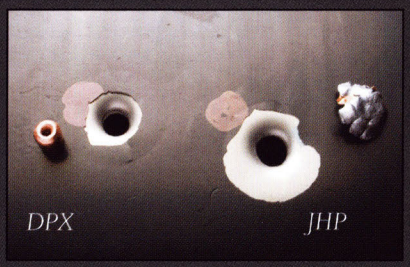


45 Auto +P 230gr Jacketed Hollowpoint Velocity 950 fps.

"We believe that velocity is king! High energies enhance bullet performance and increase stopping power."

Peter Pi Sr.

Designed for Maximum Penetration, COR®BON's DPX is your best choice. DPX is a unique type of ammunition that utilizes the Barnes X bullet. The projectile is 100% copper with a large deep Hollow Point. Expansion is never an issue with DPX. The DPX round proved to be ideal when put through rigorous barrier performance testing. All calibers of DPX penetrate in the ideal 12"-18" range when fired through a cloth barrier. When fired at hard, heavy barriers like drywall, plywood, auto steel and auto glass, the DPX still penetrated in the 12"-18" range while retaining 100% of its weight. This round is extremely accurate and has low muzzle flash. For situations where barriers become an issue, DPX is your #1 choice!



Auto Steel: DPX vs. Traditional JHP

"South Africa, in my opinion, one of the most violent and dangerous places on the face of the earth. Smart people there carry guns; not necessarily out of choice, but out of necessity ... because they have to. These smart people load up with COR®BON, because they want to. When the lives of people that I care about are on the line my choice is clear. I highly recommend and use COR®BON ammo. DPX and Pow 'RBall ammunition works better than anything else, always ... period!"

Ross Botha
George, South Africa
International Firearms Training Academy, Certified Counselor and Trainer

COR®BON Performance Match ammunition gives you the leading edge in accurate tactical applications and competition. These loads are outstanding for long range shooting. They are available in both rifle and pistol loads.

We use world renowned match components such as Sierra, Berger, Montana Gold, Lapua Brass and Bullets. Performance Match ammo offers reduced recoil and muzzle signature.

COR®BON's Performance Match ammunition has been used successfully by elite Sniper teams. The COR®BON Sniper Team was awarded the top three positions in the 2007 Allegheny Sniper Challenge, against the most elite shooters in the world.

We believe that COR®BON's Performance Match ammunition will give you the confidence to become a champion.

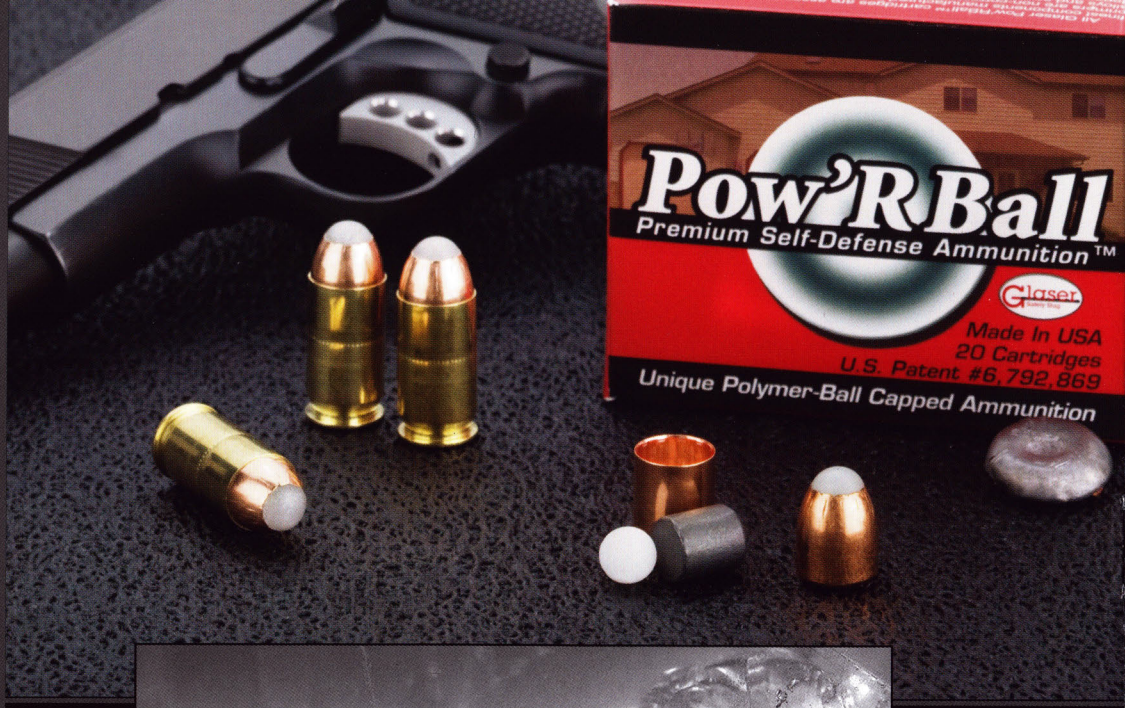
COR®BON's Performance Match Ammunition is the most consistent ammo I use, period. Nothing holds center like COR®BON, in fact I trust COR®BON so much we bet the Sniper's Hide Cup on it.

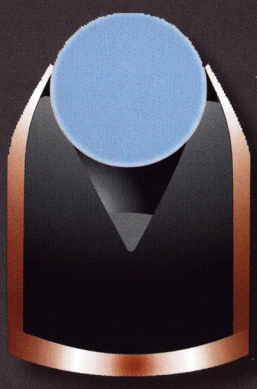
COR®BON, Official Supplier of the 2008 Sniper's Hide Cup, 308 only match.

- Frank Galli, *(Lowlight) Sniper's Hide*

Peter Pi Sr. developed Pow'RBall ammunition in 2001. Pow'RBall consists of a conventional jacketed hollow point bullet with polymer ball crimped in the opening. Initially, it was designed to alleviate feeding problems with some newer compact pistols. We discovered in our initial testing, that the controlled expansion was as good, or better then the best hollow point ammunition available. In real life Pow'RBall's high energy, expansion and terminal effectiveness is second to none.



45 Auto+P 165gr Pow'RBall Velocity 1225 fps.



- Polymer Ball
- Enhanced Feeding
- Excellent Performance
- Penetration
- High Velocity
- Reduced Recoil

{ The unique design has been awarded a U.S. patent. 6.792.869 }

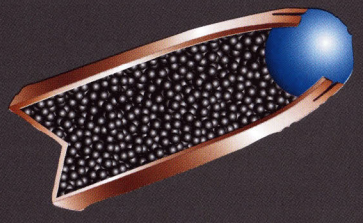
Glaser Safety Slug has been serving Law Enforcement for over 35 years! The Safety Slug has a thin walled bullet jacket combined with a compressed load of either #6 or #12 shot topped off with a round polymer ball. It is noted for smooth feeding, limited penetration and reduced ricochet where over penetration is a major concern (courthouse security, airports, etc.) The Glaser Safety Slug gives you proven stopping power without over penetration and the comfort of knowing that innocent bystanders are not in jeopardy.



"Considering the research, design and precision engineering invested in Glaser Safety Slug ammunition, it's no surprise that it delivers exactly as advertised; significantly reduced rigid-surface penetration, minimized ricochet hazard, and maximum fight-stopping terminal effect. What is surprising is that it achieves those effects with such high velocity and muzzle energy while remaining eminently 'shooter-friendly' in terms of relative recoil and accuracy. In any confined-quarters mission with innocents present - where you may have only one difficult shot, and it has to count - Glaser Safety Slug might not be just the best choice, but the ONLY choice. It is, in my opinion, the premier hostage-rescue round."

-Lt. John Morrison

San Diego Police Department, retired, former SWAT Commanding Officer and Director of Training. Field Editor for American Handgunner, GUNS, and American COP magazines.

While you serve and protect, COR®BON products serve you by providing quality ammunition for your protection.
